

Cable Management Panels

TE Connectivity's AMP NETCONNECT Cable Management Panels provide a complete solution for routing and protecting patch cords and station and equipment cabling. When mounted to EIA standard 19-inch racks, these panels eliminate cable clutter, organize cable routing and conserve valuable rack space. All TE Cable Management Panels are suitable for use with twisted pair, coaxial and optical fiber cables. Their field-proven designs help to maintain cable bend radii and simplify cable administration and maintenance. Panels are available in single- and double-sided versions for both horizontal and vertical cable management.

SPECIFICATION (TEXT IN BRACKETS [] REQUIRES A CHOICE.)

All equipment racks shall be augmented with a cable management system, comprised of [single-sided or double-sided] horizontal and vertical panels. Horizontal panels shall be installed between patch panels such that cable fill per side does not exceed 24 4-pair cables for 1U panels and 72 4-pair cables for 2U panels. Panels shall be comprised of PVC finger duct with a snap-on cover. On 1U panels, the front duct shall be [1.5" X 2" or 1.5" X 3"]. On 2U panels, the front duct shall be 3" X 3". Duct on the vertical panels shall be 4" X 5". Vertical panels shall be available in a side version for mounting on the side of a rack or a center version for mounting between two racks. Cable fill for vertical managers shall not exceed 240 4-pair cables per side.
